# About Mona Chalabi

*Mona Chalabi is a data journalist. She's also a writer, artist, producer, presenter and (occasionally) an actress. Using words, color and sound, Mona rehumanizes data to better help us understand our world and the way we live in it.*

*Mona works beside windows usually in Brooklyn but sometimes in her hometown, London. Her writing and illustrations have been featured in The New York Times, The New Yorker and The Guardian where she is currently the data editor. Her video, audio, and production work has been featured on Netflix, NPR, the BBC, and National Geographic.*

*Her work has earned her a fellowship at the British Science Association, an Emmy nomination and recognition from the Royal Statistical Society. In recent years, her work has been exhibited at the Tate, the Design Museum, and the House of Illustration. She studied international relations in Paris and Arabic in Jordan.*

# What is data art?

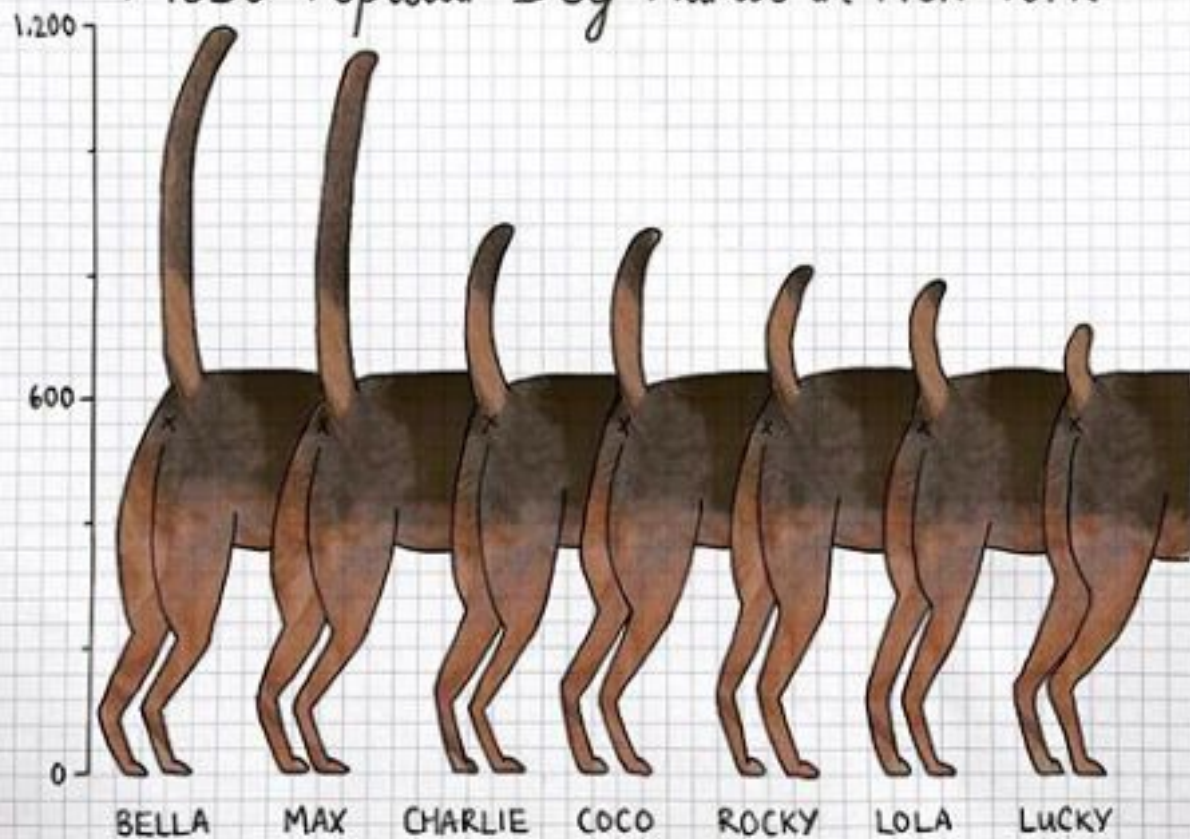

Seeing patterns and creating beauty – data visualization has become an art form. Pioneering artists who use spreadsheets, archives and digital data as their paints and canvas.

**Data journalism** or **data-driven journalism** (DDJ) is a journalistic process based on analyzing and filtering large data sets for the purpose of creating or elevating a news story.

# How long the coronavirus can survive on different surfaces:

PLASTIC =  
9 DAYS

STEEL =  
5 DAYS

PAPER =  
5 DAYS

GLASS =  
5 DAYS

CERAMIC =  
5 DAYS

WOOD =  
4 DAYS

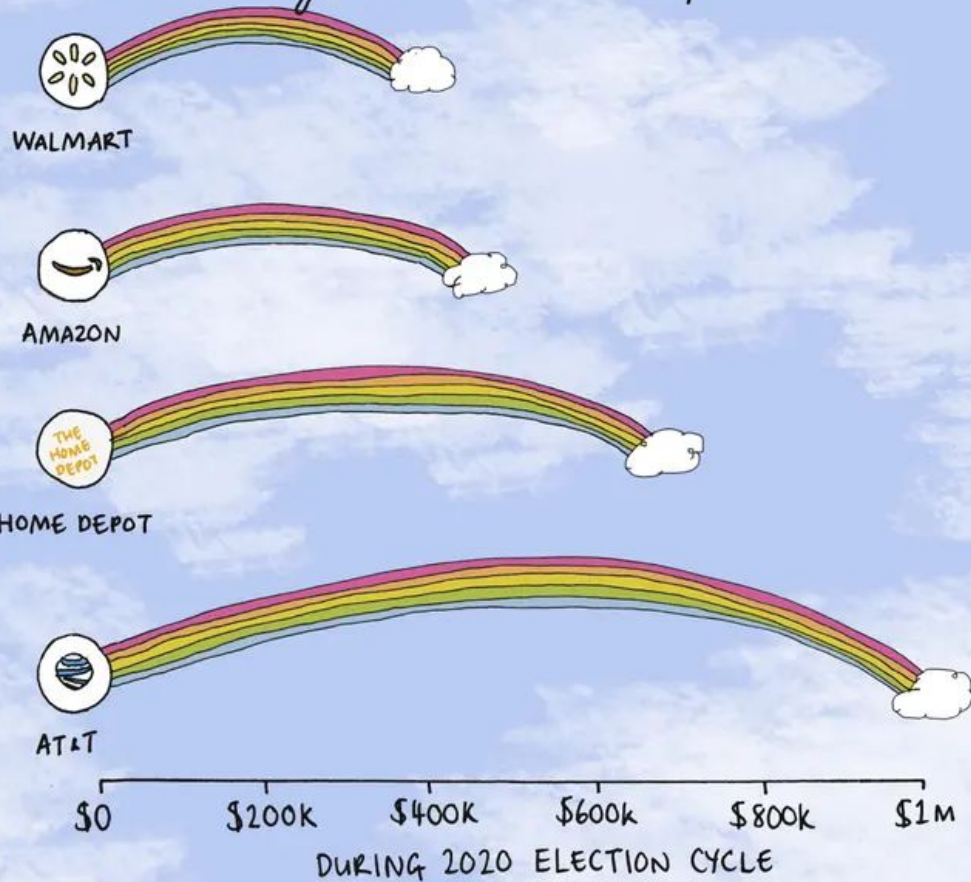

in the time it will take you to read this chart (let's say 30 seconds) an alcohol based disinfectant can deactivate the virus on any surface.

# *Project Steps*

1. Find your data set from the teacher provided resources.
2. Document your data - use your sketchbook or a notebook to copy down the statistics (*include sources*)
3. Sketch out your idea - it should somehow reflect the data your are trying to showcase.
4. Start your final. Share updates with the teacher.
